EXECUTIVE SUMMARY

Welcome to this performance report and this first section. The aim here is to give an overview of your statistics, details of which can be found later in this document

+\$0.0 NET PROFIT	-\$2028.0 NET LOSS	-\$2028 NET P&L
0.0% WINRATE/TRADE	0.0% WINRATE/DAY	
-0.0% DRAWDOWN %	0 MARTINGALE(S)	1 NO. OF TRADES
-\$2028.0 EXPECTANCY/TRADE	-\$2028.0 EXPECTANCY/DAY	

DAY BY DAY PERFORMANCE CALENDAR

AUGUST 2025

Monday	Tuesday	Wednesday	Thursday	Friday
		20 P&L: -\$2027.96 Winrate: 0.00% Trades: 1		

OVERALL PERFORMANCE REVIEW

Your best day was on August 20, 2025. During this day you still lost -\$2028.0

On the other hand, on August 20, 2025, you have lost more than -\$2028.0 which is 100.0% of all your losses for the entire challenge & your worst day

RISK MANAGEMENT EVALUATION

This section is one of the most important in the report. During your challenge, your maximum all-time drawdown, the lowest point in your account was :

-\$2028

Reached on 20 August, 2025

This drawdown should be seen in the context of your average profit/loss.

+\$0

AV. WINNING DAY

-\$2028

AV. LOSING DAY

Appart from that, you're max drawdown in a single day was

-\$2028

Reached on 20 August, 2025

During this day, you made 1 trades (1.0x your average number of trades), with a total volume of 4 contracts (1.0x your average number)

If we zoom in on your trades, we realize that your best trade was

-\$2027.96 on NQ

This trade was made on August 20, 2025 from 15:45:38 to 15:50:11 (CET) and represents 100,00% of your Final Net P&L.

In the same way, your worst account trade was

-\$2027.96 on NQ

This trade was made on August 20, 2025 from 15:45:38 to 15:50:11 (CET) and represents 100,00% of all your losses combined.

TRADE MANAGEMENT & EXECUTION

On average, your trades are lasting :

4 mins **0 min** **4.6 mins**
OVERALL AVERAGE **AV. WIN. TRADE.** **AV. LOSS TRADE.**

To be a bit more precise, here's a graph that shows your P&L during the different durations

Moreover, your volume statistics are the following

NQ

LONG VS SHORT PERFORMANCE

The purpose of this section is to give you a comparison of your Long VS Short performance. For some traders, this section proves extremely useful, as it sometimes appears that one side is far inferior to another in terms of performance.

-\$2028.0
NET P&L (LONG ONLY)

\$0
NET P&L (SHORT ONLY)

PERFORMANCE BY DAY & HOUR

Performance by day is an important part of determining your Edge in trading, you may find that you are profitable on some days but not on others, your performance is described in this chart:

P&L by Day Of The Week

In addition, your performance by hour is shown in the following graph (all hours are in EDT)

PERFORMANCE BY DAY & HOUR & SYMBOL

If you trade several assets, you may be very good on one day/time and very bad on another, but only on one specific asset. These charts should tell you.

P&L by Day Of The Week & Asset

In addition, your performance by hour is shown in the following graph (all hours are in EDT)

Color code:
NQ

PERFORMANCE OF YOUR STOP ORDERS

The purpose of this section is to give you a clearer idea of how you manage your stop orders on your trades, and whether or not, and to what extent, they benefit you.

To begin with, for 1 trades made, you placed 0 stops directly associated, which corresponds to a ratio of

0.0%

In addition, here's a chart of your cumulative daily P&L, distinguishing between trades with and without associated stop orders.

- Net P&L (Only the Trades with a Stop Loss)
- Net P&L (Only the Trades without a Stop Loss)
- Net P&L (All Trades)

BENCHMARK

It's very important to us that you understand what we mean by “consistent trader”. In this table, you'll find a comparison between your results and those we “expect” on the main metrics.

Please also note that in **no case** this list is exhaustive, not deterministic, we fund traders that don't check some of those criteria. If you seemingly check all the ticks for this Benchmark table, the « Area Of Improvement » & « Key upgrades for immediate focus » sections will provide you with everything you need to know about what you should do better.

METRIC	YOUR STATS	EXPECTED
Consistency (Per Day)	0.0%	0% - 35%
Average Winning Day OR Average Losing Day	0.0\$ OR -2028.0\$	> +811.2\$ OR > -0.0\$
Days to Recover from Max DD. Day	Way Too much	< 4 Days
No. Of Martingales	0	< 10
Expectancy Per Day	-\$2028.0	> +\$0 (Profitable)
Win./Losing Day Volume Ratio	Way Too Much	< 1.5x

PEER ANALYSIS

How do you position yourself in relation to those who started their challenge at the same time as you*?

TOP
100%
(IN P&L)

TOP
100%
(IN CONSISTENCY)

For example, a « Top 1% » means you are better than 99% of your peers for this specific metric. A « Top 100% » would mean that you are the very worst trader from your group for this specific metric only

* : The graph is filtered to show only the most visible data. Anomalies are excluded and the number of accounts displayed is also limited.

TILTS

We define a “Tilt” as a moment when you get carried away, i.e. when you've passed a large number of trades in a short space of time. The purpose of this section is to list these tilts and make some projections about what would have happened if you hadn't had them.

0

DIFFERENT TILT(S)

Congratulations! According to us you never had even a single tilt during all the 1 day you traded!

MARTINGALES

We define a Martingale as an addition to a losing position. This section is extremely important, as even regular use of this technique is certain to lead to ruin.

0

MARTINGALE(S)

Congratulations! According to us you never made even a single martingale during the 1 day you traded!

YOUR TRADER CATEGORY

Before beginning this section, a quick Disclaimer is in order.

There are as many ways to trade as there are traders, and that's the beauty of this job.

Nevertheless, it is possible to “bring order to the chaos”, i.e. to categorize traders into different groups.

These categories are our own, by no means an industry standard or norm, but simply a reflection of our own experience with the traders we've met.

Your assignment to a category is an important element in determining where you can improve, and the following sections provide more specific points, but the essentials are contained on this page.

YOUR CATEGORY IS

Lack Of Data

One of the rarest categories by far. If you were wondering why your financing was rejected despite seemingly good statistics in the 'Benchmark' section, then look no further for the reason: You didn't trade enough.

We usually expect at the extreme minimum 20-30 trades, which corresponds to about 1 trade per day for the entire challenge.

In your case, your total number of trades is less than this, so our report is biased. It's easy to be good with few trades, but very complicated to be good over a long period, and unfortunately we don't have enough trades at our disposal to say whether or not you're good.

What did we base this category on?

The justification for this category is extremely simple: you took 1 trades and we expected at the EXTREME MINIMUM 20-30.

So, how to get better knowing that ?

You can use the advice given in the following sections, but bear in mind that these tips are based on a very limited number of trades, and therefore only partially reflect the reality of your trading.

AREAS OF STRENGTH

According to our indicators, you are very good at :

- **Well... it's complicated**

Clearly, and you know it, there's a lot of things to do. But this is also a great thing because it means that this report will (hopefully) be really useful to you

AREAS OF IMPROVEMENT

This is undoubtedly the most interesting part of the report.

You absolutely need to get better at

- **Reducing Loss Size**

Try avoiding large losses that exceed your winning trades

- **Cutting Losses Quickly**

Try reducing the time you hold onto losing trades

- **Stopping on Losing Days**

You need to stop trading on losing days; you continue even when it's not your day

- **Trading More?**

We just don't have enough data to judge your level (25+ trades per month)

- **Controlling Trade Volume On Losing Days**

Work on reducing your losing days volume

KEY UPGRADES FOR IMMEDIATE FOCUS

Cut Losses Swiftly

1

Recognize the power of swift decision-making. You currently let losing trades extend, hoping they'll turn around. Set strict stop-loss orders before entering a trade and adhere to them. As soon as a trade hits that limit, exit the position without hesitation. Each pip of a loss that you prevent from escalating can transform your overall results. Practice this discipline consistently, and you should notice better averages in your trades.

Identify Losing Patterns

2

You're trading on losing days when the odds are stacked against you. First, identify the indicators or conditions that led to previous losses. Once you've pinpointed these, avoid trading under similar circumstances. Taking a break and reassessing your plan on these tough days will protect your capital and provide clarity for upcoming sessions. Utilize this strategy to see a substantial reduction in daily drawdowns.

Boost Your Volume Judiciously

3

To provide clearer data on your skill level, increase trading frequency responsibly. Begin by setting smaller, achievable targets for each trade. This ensures you're placing quality trades rather than chasing quantity. Additionally, consider using 'Phoenix Instant Logger™' to analyze your trading behavior. It'll help in identifying any blind spots in your trading tactics and further hone your decision-making process.

CONCLUSION & NEXT STEPS

We hope that you have appreciated your experience with the Merit accounts & this report. By applying the mentioned actions, you should be able to upgrade your trading.

What happens now ?

ONLY IF THIS REPORT COMES FROM A MERIT ACCOUNT :

As you know, merit accounts are only available once if you haven't bought any other challenge (Classic or Ascension). For this reason, and as a sort of complementary reward, you will find on your dashboard a 30% DISCOUNT CODE for all of our challenges.

IF THIS REPORT COMES FROM THE WEBSITE ADDON :

We hope you find this report useful. If you have any suggestions on how to improve it, we have a dedicated section of the website for that:

<https://phoenixtraderfunding.com/feature-request>

You can also Leave us a review right here !

Or follow this link : <https://www.trustpilot.com/review/phoenixtraderfunding.com>

If you have any question, don't hesitate to open a ticket on our Discord or to ask the community for a hand.

For further question you can ask for Néo Leduc, head of Support Management :

Direct Email Address : neo@phoenixtraderfunding.com

If you have any good suggestion on how we should improve things, wether it's this report, the Merit challenge, or anything on the website here's the Direct email of our CEO : leon@phoenixtraderfunding.com

GLOSSARY

Consistency : Percentage that determines the relative difference between your best earnings day and your total P&L. For example, if you have a total profit of \$10000 with your best day at \$3000, then your consistency will be 30%.

Martingale : A martingale is defined as the action of averaging a trade down, i.e. adding to an initially losing position. Although tempting, the martingale is a very big trap to avoid, as you expose yourself to very high risks (of ruin) by executing it.

Scaling : Scaling is quite similar to a “Positive Martingale”. Simply put, “scaling” a trade means adding to an already winning position. Scaling is one of the most difficult things to master in trading, as many people add to their positions where the right action was to take profits.

Overtrading : Overtrading is another major pitfall. As the name suggests, it involves taking on (too) many trades over a given period. A trader who executes 100 or 200 trades a day is most likely overtrading, even if he's a Scalper. Quality over quantity

Drawdown % : Drawdown indicator in %, from highest P&L to current P&L. If, for example, your high was \$10,000 and your current P&L is \$2500, your drawdown will be 75%. It's important to note that this calculation obviously takes into account the profits generated, and not just the initial account balance, as you might think.

A Trade : Our definition of a trade is different from that of Rithmic. For Rithmic, each buy contract that corresponds to a sell contract is equivalent to a trade. For example, if you take a position of 5 micros in 5 different orders, it will be counted as 5 trades.

At Phoenix, we've taken a different definition, where each position placed when another position is already in progress is just a variation of the same trade. In my previous example, your 5 orders would therefore be counted as 1 trade, itself comprising 1 entry order and 4 “partial orders”.

Some indicators, such as the “Martingale”, count martingales on partial orders. This is why you can have more “martingales” than total trades (even if this is rare).
