# EXECUTIVE SUMMARY

Welcome to this performance report and this first section. The aim here is to give an overview of your statistics, details of which can be found later in this document

<b>+\$298.1</b> NET PROFIT	<b>-\$-0.0</b> NET LOSS	<b>+\$298</b> NET P&L
<b>100.0%</b> WINRATE/TRADE	<b>100.0%</b> WINRATE/DAY	
<b>0.0%</b> DRAWDOWN %	<b>0</b> MARTINGALE(S)	<b>3</b> NO. OF TRADES
<b>+\$99.4</b> EXPECTANCY/TRADE	<b>+\$298.1</b> EXPECTANCY/DAY	

---

# DAY BY DAY PERFORMANCE CALENDAR

## SEPTEMBER 2025

Monday	Tuesday	Wednesday	Thursday	Friday
		<b>P&amp;L: +\$298.06</b> Winrate: 100.00% Trades: 3		

# OVERALL PERFORMANCE REVIEW

Your best day was on September 24, 2025. During this day you have won \$298.1 which is about 100.0% of your total Net P&L

## PROFITABILITY ANALYSIS

**+\$310**

GROSS P&L

**-\$12**

COMMISSIONS

**+\$298**

NET P&L

**+\$298**

AV. WINNING TRADE

**-\$0**

AV. LOSING TRADE

Your average losing trade is -0.0x your average winning trade

---

**3** AVERAGE NO. OF TRADES ON A WINNING DAY

**0** AVERAGE NO. OF TRADES ON A LOSING DAY

**3** AVERAGE NO. OF TRADES OVERALL

## RISK MANAGEMENT EVALUATION

This section is one of the most important in the report. During your challenge, your maximum all-time drawdown, the lowest point in your account was :

**+\$298**

**Reached on 24 September, 2025. You never went below the initial balance**

This drawdown should be seen in the context of your average profit/loss.

**+\$298**

**AV. WINNING DAY**

**-\$0**

**AV. LOSING DAY**

Appart from that, you're max drawdown in a single day was

**+\$298**

**Reached on 24 September, 2025. You never had a single losing day**

During this day, you made 3 trades (1.0x your average number of trades), with a total volume of 6 contracts (1.0x your average number)

If we zoom in on your trades, we realize that your best trade was

**+\$191.02 on NQ**

This trade was made on September 24, 2025 from 18:36:18 to 18:38:15 (CET) and represents 64.09% of your Final Net P&L.

---

In the same way, your worst account trade was

**+\$1.02 on NQ**

This trade was made on September 24, 2025 from 18:33:17 to 18:34:1 (CET) and represents Infinity% of all your losses combined.

# TRADE MANAGEMENT & EXECUTION

On average, your trades are lasting :

**1 mins**                      **1.4 mins**                      **0 min**  
**OVERALL AVERAGE**      **AV. WIN. TRADE.**                      **AV. LOSS TRADE.**

To be a bit more precise, here’s a graph that shows your P&L during the different durations

Moreover, your volume statistics are the following

**6.0**  
VOL/DAY

**6.0**  
VOL/WINNING DAY

**0.0**  
VOL/LOSING DAY

**2.0**  
VOL/TRADE.

**2.0**  
VOL/WIN. TRADE

**0.0**  
VOL/LOSE. TRADE

**2**

To be more precise, here is a detailed chart of your Net P&L per asset according to date

Color code:

**NQ**

# LONG VS SHORT PERFORMANCE

The purpose of this section is to give you a comparison of your Long VS Short performance. For some traders, this section proves extremely useful, as it sometimes appears that one side is far inferior to another in terms of performance.

**+\$298.1**  
NET P&L (LONG ONLY)

**\$0**  
NET P&L (SHORT ONLY)

# PERFORMANCE BY DAY & HOUR

Performance by day is an important part of determining your Edge in trading, you may find that you are profitable on some days but not on others, your performance is described in this chart:

P&L by Day Of The Week

In addition, your performance by hour is shown in the following graph (all hours are in EDT)

# PERFORMANCE BY DAY & HOUR & SYMBOL

If you trade several assets, you may be very good on one day/time and very bad on another, but only on one specific asset. These charts should tell you.

P&L by Day Of The Week & Asset

In addition, your performance by hour is shown in the following graph (all hours are in EDT)

Color code:  
**NQ**

# PERFORMANCE OF YOUR STOP ORDERS

The purpose of this section is to give you a clearer idea of how you manage your stop orders on your trades, and whether or not, and to what extent, they benefit you.

To begin with, for 3 trades made, you placed 0 stops directly associated, which corresponds to a ratio of

**0.0%**

In addition, here's a chart of your cumulative daily P&L, distinguishing between trades with and without associated stop orders.

- Net P&L (Only the Trades with a Stop Loss)
- Net P&L (Only the Trades without a Stop Loss)
- Net P&L (All Trades)

# BENCHMARK

It's very important to us that you understand what we mean by “consistent trader”. In this table, you'll find a comparison between your results and those we “expect” on the main metrics.

Please also note that in **no case** this list is exhaustive, not deterministic, we fund traders that don't check some of those criteria. If you seemingly check all the ticks for this Benchmark table, the « Area Of Improvement » & « Key upgrades for immediate focus » sections will provide you with everything you need to know about what you should do better.

METRIC	YOUR STATS	EXPECTED
Consistency (Per Day)	100.0%	0% - 35%
Average Winning Day OR Average Losing Day	298.1\$ OR 0.0\$	> +-0.0\$ OR > -745.2\$
Days to Recover from Max DD. Day	No Data	< 4 Days
No. Of Martingales	0	< 10
Expectancy Per Day	+\$298.1	> +\$0 (Profitable)
Win./Losing Day Volume Ratio	No Data	< 1.5x

# PEER ANALYSIS

How do you position yourself in relation to those who started their challenge at the same time as you\*?

**TOP**

**100%**

**(IN P&L)**

**TOP**

**50%**

**(IN CONSISTENCY)**

For example, a « Top 1% » means you are better than 99% of your peers for this specific metric. A « Top 100% » would mean that you are the very worst trader from your group for this specific metric only

\* : The graph is filtered to show only the most visible data. Anomalies are excluded and the number of accounts displayed is also limited.

# TILTS

We define a “Tilt” as a moment when you get carried away, i.e. when you've passed a large number of trades in a short space of time. The purpose of this section is to list these tilts and make some projections about what would have happened if you hadn't had them.

0

## DIFFERENT TILT(S)

Congratulations! According to us you never had even a single tilt during all the 1 day you traded!

# MARTINGALES

We define a Martingale as an addition to a losing position. This section is extremely important, as even regular use of this technique is certain to lead to ruin.

0

## MARTINGALE(S)

Congratulations! According to us you never made even a single martingale during the 1 day you traded!

# YOUR TRADER CATEGORY

**Before beginning this section, a quick Disclaimer is in order.**

There are as many ways to trade as there are traders, and that's the beauty of this job.

Nevertheless, it is possible to “bring order to the chaos”, i.e. to categorize traders into different groups.

These categories are our own, by no means an industry standard or norm, but simply a reflection of our own experience with the traders we've met.

Your assignment to a category is an important element in determining where you can improve, and the following sections provide more specific points, but the essentials are contained on this page.

## YOUR CATEGORY IS

## Lack Of Data

One of the rarest categories by far. If you were wondering why your financing was rejected despite seemingly good statistics in the 'Benchmark' section, then look no further for the reason: You didn't trade enough.

We usually expect at the extreme minimum 20-30 trades, which corresponds to about 1 trade per day for the entire challenge.

In your case, your total number of trades is less than this, so our report is biased. It's easy to be good with few trades, but very complicated to be good over a long period, and unfortunately we don't have enough trades at our disposal to say whether or not you're good.

## What did we base this category on?

The justification for this category is extremely simple: you took 3 trades and we expected at the EXTREME MINIMUM 20-30.

## So, how to get better knowing that ?

You can use the advice given in the following sections, but bear in mind that these tips are based on a very limited number of trades, and therefore only partially reflect the reality of your trading.

# AREAS OF STRENGTH

According to our indicators, you are very good at :

- **Maximizing Winning Trades**

You're great at letting winners run to maximize gains

- **Scaling Expertise**

You scale positions like a pro

- **Balanced Win/Loss Ratio**

You ensure wins aren't erased by losses

# AREAS OF IMPROVEMENT

This is undoubtedly the most interesting part of the report.

You absolutely need to get better at

- **Having Red days**

You've been lucky without losses, but they'll come eventually; stay ready.

- **Being Consistent**

Your highest profits have been impressive, but aim to bring them down to a 35-45% range.

- **Trading More?**

Insufficient trading data—try making 25+ trades monthly to gauge progress accurately.

# KEY UPGRADES FOR IMMEDIATE FOCUS

## Prepare for Red Days

1

As a trader, the safest time to prepare for inevitable losing days is when you're on a winning streak. Develop a strict risk management strategy now. Set daily loss limits that are a comfortable percentage of your capital to avoid emotional decision-making. This will place a safety net under your gains. Also, practice the discipline of sticking to your stop losses to build resilience for when the market turns unfriendly.

## Balanced Profit Days

2

Your best day currently represents a huge chunk of your profits, which can distort your overall performance. Strive to achieve more consistent returns by smoothing out your profitability curve. Avoid relying too heavily on single days by analyzing what strategies contributed to that high and replicating them with smaller positions. Set targeted daily profit percentages to spread out your profits more evenly across the month.

## Increase Trade Frequency

3

With just 3 trades this month, there's insufficient data to gauge your trading style effectively. Aim for at least 25 trades per month to better understand your strategy's nuances and grow your trading skill set. As you increase your trade frequency, maintain careful records of each trade's rationale, execution, and outcome. Utilize tools like Phoenix Instant Logger™ to analyze your performance patterns and refine your strategy.

## CONCLUSION & NEXT STEPS

We hope that you have appreciated your experience with the Merit accounts & this report. By applying the mentioned actions, you should be able to upgrade your trading.

---

**What happens now ?**

***ONLY IF THIS REPORT COMES FROM A MERIT ACCOUNT :***

As you know, merit accounts are only available once if you haven't bought any other challenge (Classic or Ascension). For this reason, and as a sort of complementary reward, you will find on your dashboard a 30% DISCOUNT CODE for all of our challenges.

***IF THIS REPORT COMES FROM THE WEBSITE ADDON :***

We hope you find this report useful. If you have any suggestions on how to improve it, we have a dedicated section of the website for that:

<https://phoenixtraderfunding.com/feature-request>

If you have any good suggestion on how we should improve things, wether it's this report, the Merit challenge, or anything on the website here's the Direct email of our CEO : [leon@phoenixtraderfunding.com](mailto:leon@phoenixtraderfunding.com)

# GLOSSARY

**Consistency** : Percentage that determines the relative difference between your best earnings day and your total P&L. For example, if you have a total profit of \$10000 with your best day at \$3000, then your consistency will be 30%.

**Martingale** : A martingale is defined as the action of averaging a trade down, i.e. adding to an initially losing position. Although tempting, the martingale is a very big trap to avoid, as you expose yourself to very high risks (of ruin) by executing it.

**Scaling** : Scaling is quite similar to a “Positive Martingale”. Simply put, “scaling” a trade means adding to an already winning position. Scaling is one of the most difficult things to master in trading, as many people add to their positions where the right action was to take profits.

**Overtrading** : Overtrading is another major pitfall. As the name suggests, it involves taking on (too) many trades over a given period. A trader who executes 100 or 200 trades a day is most likely overtrading, even if he's a Scalper. Quality over quantity

**Drawdown %** : Drawdown indicator in %, from highest P&L to current P&L. If, for example, your high was \$10,000 and your current P&L is \$2500, your drawdown will be 75%. It's important to note that this calculation obviously takes into account the profits generated, and not just the initial account balance, as you might think.

**A Trade** : Our definition of a trade is different from that of Rithmic. For Rithmic, each buy contract that corresponds to a sell contract is equivalent to a trade. For example, if you take a position of 5 micros in 5 different orders, it will be counted as 5 trades.

At Phoenix, we've taken a different definition, where each position placed when another position is already in progress is just a variation of the same trade. In my previous example, your 5 orders would therefore be counted as 1 trade, itself comprising 1 entry order and 4 “partial orders”.

Some indicators, such as the “Martingale”, count martingales on partial orders. This is why you can have more “martingales” than total trades (even if this is rare).

A handwritten signature in black ink, appearing to read 'Leon Grimm', with a long horizontal flourish extending to the right.
